# Q1 2021

1. Launch of the alpha version of the **NFT platform #1** in the CosmoFund ecosystem (CosmoMasks)
2. Launch of the alpha version of Farm – a platform in the Ethereum network (CosmoSwap)

1. Launch of the alpha version of a CosmoSwap farm-platform in the Binance Smart Chain network on PanCake V1
2. Updating stacking and farming pools in the Ethereum network
3. Launching additional liquidity pools on PanCake V2 in the Binance Smart Chain network
4. June, 1st – technical launch of the CosmoMasks platform
5. June, 1st – closing COSMO emission
6. Technical launch of the CosmoSwap platform
7. Launch of the NFT platform #2 in the CosmoFund ecosystem (CosmoBugs)

# Q2 2021

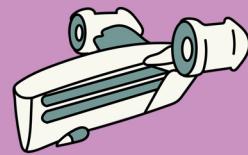

# Q3 2021

1. Launch of the **NFT platform #3**
2. Launch of the **NFT platform #4**
3. Launch of the **NFT platform #5**
4. Launch of the functionality of the exchange of powers of NFT collections on Cosmo Universe Power
5. Adding CUP/Cosmo liquidity pools (valid for 100 days)
6. CosmoSwap update – the addition of the Cosmo and NFT farming freeze function.

# Q4 2021

1. The official global launch of the CosmoFund company
2. Entering an insurance contract with a large American company that provides full financial security for all CosmoFund platforms.
3. Launch of the **NFT platform #6**
4. Launch of the **NFT platform #7**
5. Launch of the **NFT platform #8**
6. Launching final stacking and farming liquidity pools in the Ethereum and Binance Smart Chain networks (valid for 10 years, using the algorithm of quarterly reduction of earnings by half)
7. Accessing the CoinMarketCap and CoinGecko

# The first half of 2022

1. Launch of NFT MarketPlace
2. Launch of the **NFT platform #9**
3. Launch of the **NFT platform #10**
4. Launch of the **NFT platform #11**
5. Launch of the **NFT platform #12**
6. Launch of the **NFT platform #13**
7. Launch of the **NFT platform #14**
8. Launch of the rating aggregator from CosmoFund
9. Binance stock market listing

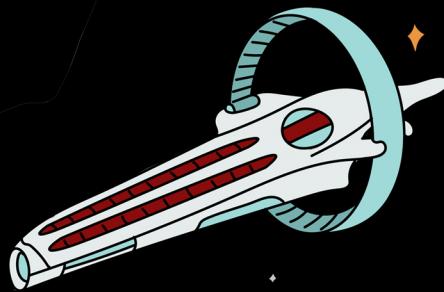

# The second half of 2022

**YEAR  
2023**

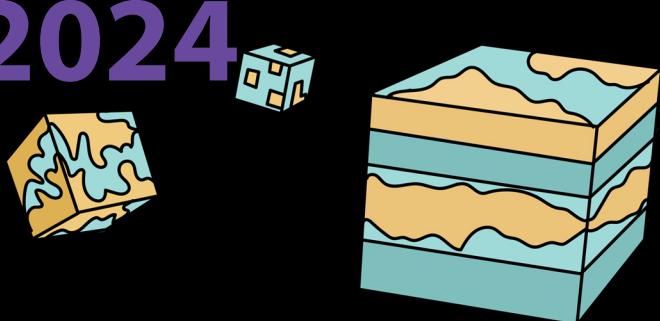

1. Launch of **twelve NFT platforms**

1. Launch of **twelve NFT platforms**

**YEAR  
2024**

# YEAR 2025

- ## 1. Launch of twelve NFT platforms

# YEAR 2026

# YEAR 2027

- ## 1. Launch of **twelve NFT platforms**

# YEAR 2028

# YEAR 2029

- ## 1. Launch of twelve NFT platforms

# CosmoFund

invests in innovative technologies in order to make the main idea come true which is to make our life truly multi galactic. The company's investment package includes not only blockchain directions, but also areas related to artificial intelligence, energy and space exploration.

The **CosmoMasks** collection is the first of all future NFT collections and new CosmoFund projects, and it is the most valuable of all, due to the opportunity to become a member on the most favorable terms and with a minimum entry threshold.

## Important!

It is planned to launch more than 100 NFT platforms (including CosmoMasks) in the CosmoFund ecosystem. NFT from each collection will not only be an active asset that grows in price, but will also provide its owner with passive income in the form of the company's cryptocurrency (which will also become more expensive over time).

In future, every 5th NFT platform launched according to the roadmap, will provide an opportunity to receive income from a real business.

And the first among such platforms will be the NFT collection, which provides its owners with passive income (10 to 50%) from booking rooms in CosmoFund hotels. Each NFT in this collection will be linked to its own hotel room. As the cost of NFTs in this collection grows, the category of rooms will increase - from regular to deluxe and even presidential suits!

## What are our goals?

**Goal #1** is to occupy top spots in all rating aggregators in the world. While still in the pre-launch phase, the first NFT platform (CosmoMasks) has already managed to take a spot in the TOP-2 NFTs in the Ethereum network.

**Goal #2** is to reach an average price of 100 ETH for all NFT companies.

The launch of the stacking and farming platform, as well as the attraction of the global top leaders, will ensure a rapid rise of the company's internal currencies prices. Furthermore, the launch of each subsequent NFT platform will automatically increase the value of the previous NFT collections, as

**the starting cost of each new collection will increase by 1 ETH.**

Starting with the launch of the 2nd NFT platform, the opportunity to purchase NFT for the company's cryptocurrency will be implemented. After that, the tokens will be burned, due to which additional leverage will be provided towards the growth of their exchange rate.

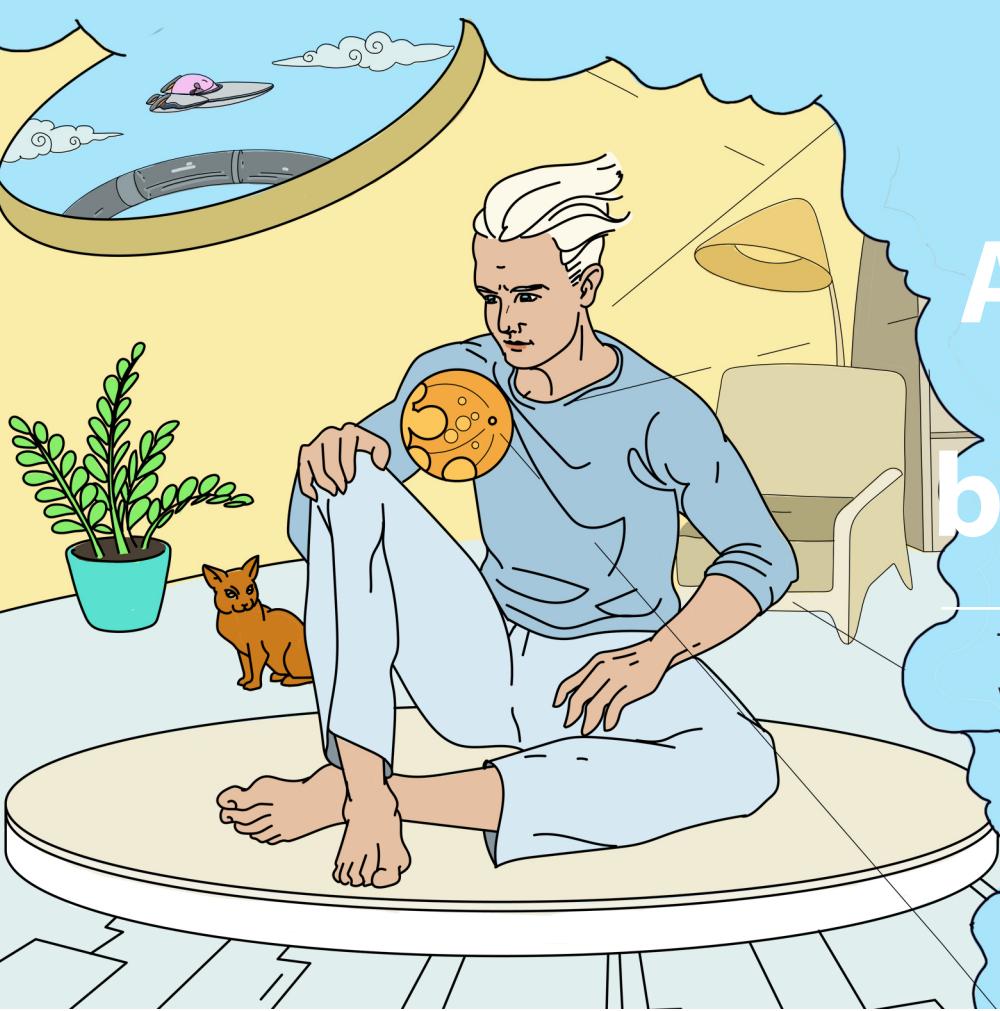

### **Cosmo Universe Power**

With the introduction of the function of exchanging the powers of NFT collections on Cosmo Universe Power, participants will be able to purchase NFTs from any collections for this token (with the exception of CosmoMasks and CosmoBugs collections).

When exchanging power tokens for Cosmo Universe Power, powers will be burned, which will begin to increase the deficit and strengthen the growth of the rate for a specific power.

In the future, the CUP token will not only be used to buy NFTs, but also provide certain benefits in games from CosmoFund.

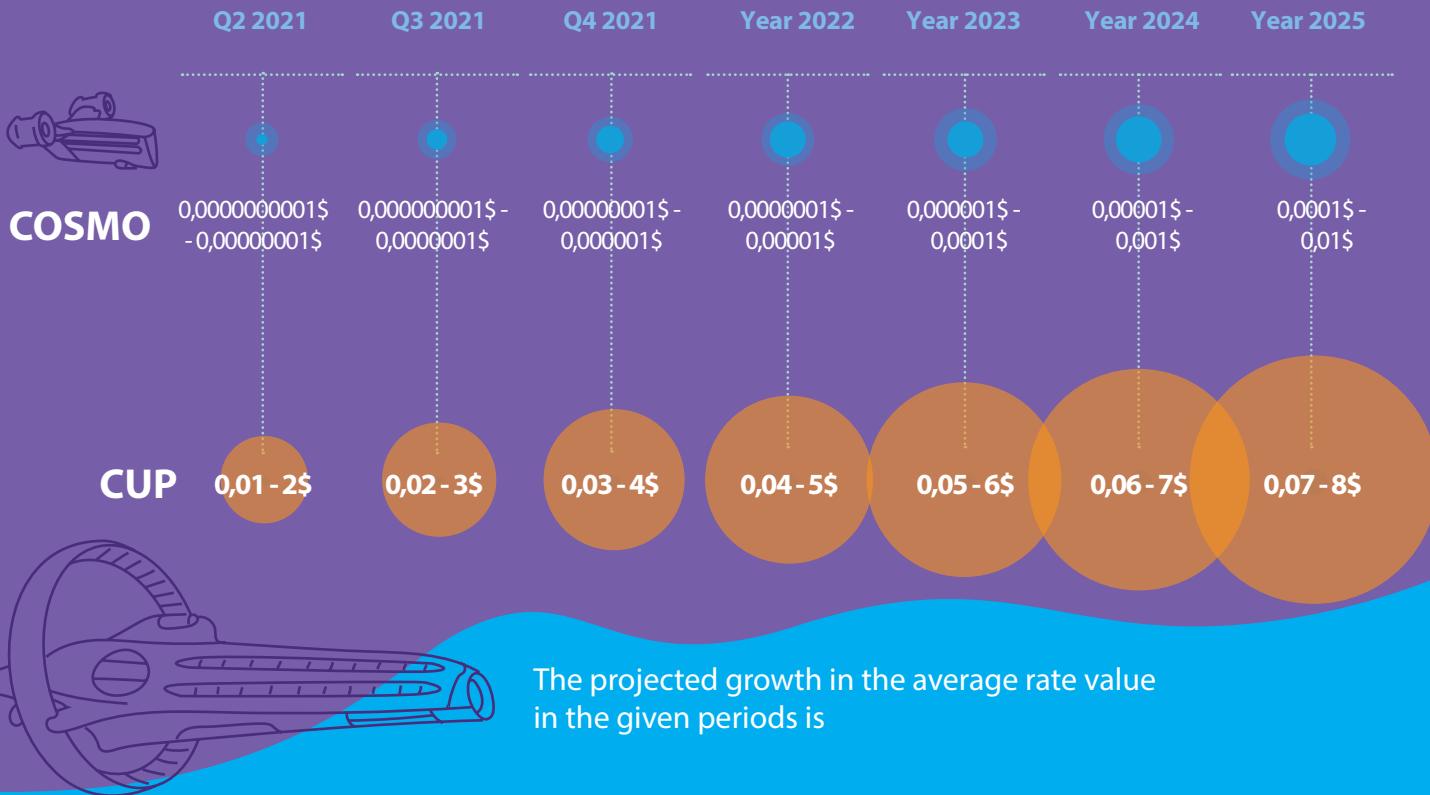

Holders of large COSMO quantities will also be interested in freezing their funds in order to start farming not only the company's cryptocurrency, but NFTs themselves! Upon freezing 1 trillion COSMO, you will start receiving 1 NFT from CosmoFund per month passively!

**And this is  
just the  
beginning.**

The launch of subsequent IT startups with a potentially huge audience will rapidly increase the company's capitalization.

# Planned COSMO and CUP exchange rate

**1000% on COSMO and**

**127% on Cosmo Universe Power.**

Please keep in mind that the figures stated above are indicative only. It is impossible to accurately determine which levels the exchange rate can reach. We allow for the likelihood of these values turning out to be much higher.
