1. Abstract

The concept and idea of the CosmoFund ecosystem has been developed for over 2 years. The ecosystem consists of many investors, crypto artists, IT professionals, PR specialists, collectors, who are united by a global idea - to create a single NFT ecosystem, consisting of more than 100 NFT collections, as well as achieve an average value of 100 ETH on NFTs.

CosmoFund was introduced in March 2021 with the launch of the first CosmoMasks NFT collection and the CosmoSwap DeFi platform.

And from the very first days they have won the attention of many NFT collectors and investors.

We follow the following principles:

● Refine the product to meet the needs of users;

● Always listen, communicate and give feedback;

● openly talk about the product and plans for the future;

● Always keep official promises;

● Implement many unique features;

● Whenever possible, be friendly and interesting.

With the help of existing products and further development, CosmoFund seeks to prepare the entire cryptocurrency market for the mass adoption and development of NFT collectibles, which will serve as a springboard for the implementation of new large-scale projects that will cover a large number of areas of everyday life.

CosmoFund ecosystem products:

- **Digital assets in the form of NFT**

  An NFT, or a non-fungible token, is a unique digital object, the originality and ownership of which is confirmed by blockchain technology. An NFT is a modern digital title to an object that verifies its origin, creator and current owner, the data on when somebody purchased it, etc. The owner of NFTs from various CosmoFund collections accumulates tokens of

these collections every day and may exchange them for USDT on the cosmoswap.space website in the "Exchange" tab. In this respect, one may use the NFT as a cryptocurrency mine, which generates income for ten years (only without consuming electricity) and is likely to be sold on the secondary OpenSea market for much more than the initial price.

- **DeFi pharming of the ecosystem's cryptocurrencies**

DeFi pharming allows you to accumulate ecosystem tokens and is designed for up to 70 years, but it is possible to withdraw funds at any time and exchange tokens for USDT.

2. Problems & Solutions

Problem 1. Currently, a lot of HYIP projects are being scammed. And it's very hard to find a really worthwhile project focused on long-term work.

Solution

CosmoFund plans to launch over 100 NFT collections in 10 years, 4 of which have already been launched as of 9.2021. The ecosystem of projects is actively developing and this fact guarantees long-term work.

Problem 2. Leaders constantly have to build a team from scratch, starting to work on a new project.

Solution

CosmoFund can be compared to a product company whose end product is NFT. As you know, product companies are distinguished by a high degree of stability. Thus, CosmoFund completely solves the problem and allows leaders to earn money for decades without fear of losing their team.

Problem 3. Low level of earnings in product companies.

Solution

Since the product is digital, and the NFT and DeFi direction is a new, fashionable and rapidly developing trend, these products can be sold as fast as in HYIPs. Therefore, the earning opportunities may tend to the HYIPs level.

Problem 4. The presence of an admin in the project, which increases the likelihood of an unexpected project closure.

Solution

All NFT collections and DeFi pharms are fully decentralized and located on the blockchain. In the CosmoFund ecosystem, the concept of an admin is absent as such.

Problem 5. Affiliate programs do not provide any scalable business opportunities and are based on inferior or outdated models.

Solution

CosmoFund has developed a binary affiliate program with 2 different types of rewards and with ability to get bonuses from unlimited referral levels (even from 1 million levels and more) and to build profitable long-term bonuses flow. The program allows its users to build a full affiliate structure with possible organic growth and reward receival flow. As well as CosmoFund introduces the first DeFi farming Cosmo and CCLP tokens which allow to farm extra Cosmo and CCLP on the affiliate program.

3. CosmoFund NFT platforms

The main activity of the CosmoFund ecosystem is the scaling and distribution of NFTs from its many collections, as well as the introduction of this technology into the daily areas of everyday life.

According to the roadmap, over a hundred NFT collections are planned to be launched in about 10 years. Such a scaling of the ecosystem will allow it to take a leading position in the NFT niche and in the cryptocurrency market in general.

NFTs from the CosmoFund collections are not only unique crypto art, but also miners. Each NFT

passively generates a fixed amount of "power" every second. This power can be used to name your NFT to make it even more unique. The cost of the "strength" of a particular collection will be determined by the demand for that collection.

Also, some collections are tied to real business. For example, all NFTs from the 5th collection "CosmoEstate" are provided with real estate square meters. When purchasing a certain number of NFTs from this collection, you can exchange them, for example, for apartments in Antalya or Seychelles, or you can keep your NFTs and receive passive income from renting out your square meters. For more information, refer to the main CosmoFund site or directly to the CosmoEstate collection site itself.

4. CosmoSwap platform

4.1. CosmoSwap infrastructure

- High performance matching engine.

- Custom and secure digital assets processing system.

- Revolutional affiliate program with unlimited number of referral levels and 2 types of different bonuses.

- Native Cosmo and CCLP tokens distribution technical platform based on DeFi staking/farming mechanics with 4 different farming ways.

- Cosmo and CCLP staking have not only a profitable reason but also an utility key feature. The moreyou stake - the higher affiliate package you get - the more profitable farming itself.
- Personal dashboard with the powerful functionality.

4.2. Technical details

Due to the security measures, a detailed technical description is non-compliant with the confidentiality guideline.

4.3. Cosmo and CCLP distribution via DeFi staking/farming

CosmoSwap issues native Cosmo and CCLP tokens through the DeFi staking / farming mechanic. This mechanic allows the issuance of tokens, which will be traded on the free market at the same time.

The more you stake USDT, the higher your profitability from farming, but at the same time the higher your partner package, which allows you to earn more bonuses through the affiliate program, including those that allow earn additional bonuses from people farming in your affiliate structure.

4.4. Support, Community management and SMM

CosmoSwap aims to provide a fulfilling support experience, daily progress, current situation updates and proper communication among users in the ecosystem.

With due consideration of CosmoFund goals, various community events and entertaining material are a part of the aforementioned departments. CosmoFund constantly collects customer feedback by any accessible means in order to improve the service and be connected to its user-base.

5. Affiliate program

5.1. General information

Affiliate Program is a binary based referral program for users of CosmoSwap platform. The program features an unlimited number of referral levels that are structured as a binary tree, 4 types of bonuses and is integrated into Cosmo and CCLP distribution model. Its main purpose is incentivizing people to promote CosmoSwap platform among their friends, followers and communities.

5.2. The binary tree

CosmoSwap affiliate binary tree is an organizational structure, where new members are placed into a system with a tree-like structure where each new member of the organization has left and right sub-trees (teams). Each member has 2 places at their first level, 4 places at their second level, 8 places on their third level and so on.

Every participant of CosmoSwap Affiliate Program has a Sponsor - the affiliate participant, whose referral link was used to sign up. If the participant did not sign up using someone's referral link, CosmoSwap platform automatically becomes their Sponsor itself.

As each first referral level consists of only 2 people, new members are placed on referral levels that are below the first referral level causing the spillover effect.

5.3. Reward types and tokens integration

CosmoSwap affiliate program is directly integrated into the token distribution model and provides an opportunity to receive rewards from it.

Putting the more USDT equivalent money on the staking people get the higher affiliate package. The higher affiliate package allows to get more rewards and benefits in the affiliate program.

Condition: USDTstaked sum equivalent	STARTER	PARTNER	PRO	VIP	ELITE	MAX
	< 50 USDT	50 USDT	500 USDT	3 000 USDT 1 Cosmo NFTs	10 000 USDT 3 Cosmo NFTs	50 000 USDT 5 Cosmo NFTs
Direct StakingReward	No bonus	5%	8%	10%	15%	20%
	Percentage of Cosmo or CCLP received from the farmed Cosmo or CCLP of personally invited referrals					
Team Staking Reward	No bonus	5%	8%	10%	15%	20%
		Percents from smallest total farmed Cosmo or CCLP from one of the two teams.				

The referral program allows to get two types of rewards:
1. Rewards from all expenses of people in your affiliate structure.
2. Rewards from Cosmo and CCLP yield farming of your affiliate structure. Getting these rewards is apart of yield farming itself.

For a detailed up-to-date CosmoSwap affiliate program description go to our [website](#).

6. Cosmo and CCLP tokens distribution model

6.1. Cosmo and CCLP tokens description

Cosmo and CCLP are a utility tokens - a type of digital voucher for goods or services described in this document. Cosmo and CCLP token are not subjects to any capital market regulation. It is neither a security nora capital investment.

Cosmo:

Token Type (Initially): ERC20 / BEP20
Total Token Supply: 920 000 000 000 000 / 920 000 000 000 000

CCLP:

Token Type (Initially): BEP20
Total Token Supply: 17 247 860 982 318

6.2. Cosmo and CCLP use-cases

Cosmo and CCLP may provide the following opportunities while being holded by a user:

- Buying NFTs from CosmoFund Collections

- The ability to make payments in services, projects, applications, games that CosmoFund will launch in the future;

- Part of the affiliate program service features.

Cosmo and CCLP will be traded on the largest crypto exchanges (such as Binance) as well as on their own exchange after its launch.

CosmoFund plans to integrate additional Cosmo and CCLP use-cases with the development of new services.

6.3. CCLP minting

Through the CosmoSwap platform, everyone has the opportunity to exchange their Cosmo-CUP LP for a CCLP token. Cosmo-CUP LP can only be created on the Ethereum network. The exchange takes place as follows: your Cosmo-CUP LPs are blocked in liquidity on the Ethereum network, and in the Binance Smart Chain network, CCLP tokens are credited to your wallet in a ratio of 1 to 1. CCLP is credited by minting additional CCLPs to the total volume of CCLP tokens provided to distribution in the pharming CCLP-LP.

6.4. Distribution details

CCLP token distribution will last around 72 years and consists of various distribution mechanics related with DeFi yield farming techniques.

For more clarification, the description is divided into three parts corresponding to each distribution mechanic. The said description is shown in the following sections.

The following list of distribution adjustments apply:

1. The token distribution is considered completed when all of the tokens, allocated fordistribution, have been distributed;

2. Tokens received during yield farming period can immediately be used for trading as wellas for external withdrawal;

6.5. CCLP Distribution Schedule

This schedule is for distribution via yield farming model during the around 72 years – 17 247 860 982 318 CCLP

The CCLP staking distribution period is around 72 years from the launch of the smart contract and consists of 20 periods:

1. The first 7 days will be distributed 4 000 000 000 CCLP each day.

2. The next 7 days will be distributed 3 000 000 000 CCLP each day.

   Then the next 7 days will be distributed 1 050 000 000 CCLP each day and then according to acertain schedule:

3. For the next 3 months, every week (7 days), the daily pool will grow for 4% of the poolsize in the previous week. The pool size changes 52 times every year.
4. For the next 3 months, every week, the daily pool will increase by 2% of the pool size inthe previous week.
5. For the next 3 months, every week, the daily pool will increase by 1% of the pool size inthe previous week.
6. For the next 3 months, every week, the daily pool will stay the same.

7. For the next 6 months, every week, the daily pool will decrease by 0.05% of the pool sizein the previous week.
8. For the next 6 months, every week, the daily pool will decrease by 0.1% of the pool sizein the previous week.
9. Over the next 6 months, every week, the daily pool will decrease by 0.15% of the poolsize in the previous week.
10. For the next 6 months, every week, the daily pool will decrease by 0.2% of the pool sizein the previous week.
11. Over the next 12 months, every week, the daily pool will decrease by 0.25% of the poolsize in the previous week.
12. Over the next 12 months, every week, the daily pool will decrease by 0.3% of the poolsize in the previous week.
13. Over the next 12 months, every week, the daily pool will decrease by 0.35% of the poolsize in the previous week.
14. Over the next 12 months, every week, the daily pool will decrease by 0.4% of the poolsize in the previous week.
15. Over the next 12 months, every week, the daily pool will decrease by 0.3% of the poolsize in the previous week.
16. Over the next 24 months, every week, the daily pool will decrease by 0.2% of the poolsize in the previous week.
17. For the next 4 years, every week, the daily pool will decrease by 0.1% of the pool size inthe previous week.

18. For the next 8 years, every week, the daily pool will decrease by 0.05% of the pool size in the previous week.

19. For the next 40 years, every week, the daily pool will decrease by 0.01% of the pool size in the previous week.

20. For the next 486 weeks, every week, the daily pool will decrease by 0.005% of the pool size in the previous week.
Image 1. The weekly token distribution schedule for all 72 years - 3728 weeks.
Image 2. Weekly token distribution schedule for the first year - 52 weeks. (767 687 634 592,962 CCLP will be distributed in total).

Image 3. The weekly token distribution schedule for the first 3 years - 156 weeks. (A total of 2 559 028 560 857,68 CCLP will be distributed).

A fixed number of CCLP tokens will be distributed each week.

As you can see from the charts, the first two weeks will be distributed the largest number of tokens per week - a total of 49 000 000 000 CCLP. This is a promotional distribution, organized to attract and reward the very first staking participants. At first, there will be a minimum number of staking participants, but at the same time - the maximum profitability. This can be viewed as a kind of airdrop.

Then, during the first year, the distribution number of tokens distributed each day will increase. This is the phase of growth in the number of staking participants, for which a sufficient supply of tokens must be issued.

Then comes the phase of gradual reduction of daily token distribution pools. It is assumed that during this time CosmoSwap may gain sufficient popularity, the price of the CCLP token will receive acertain stability, supported by real demand among exchange users. This phase is intended to slow down the release of new tokens, while creating a shortage.

6.6. Distribution Ways/Pools

All 17 247 860 982 317,8 CCLP distribution via yield farming model during the around 72 years will be splitbetween following pools and shares:

1. Personal Staking Pool - personal yield farming (profitability depends only on personalactivity). Blockchain based farming. All rules are declared in the smart contract.

2. Extra Staking Bonus Pool - CosmoSwap platform based staking. All rules are declared and implemented in the CosmoSwap business logic and this logic is centralized.

a. Time Staking Bonus Pool - extra bonus depending on the time of the personalstaking performing.

b. Direct Referrals Staking Pool - rewards from the staking of direct referrals.

c. Affiliate Team Staking Pool - rewards for building an affiliate structure and stakingof people in this structure.

3. CosmoFund Share - tokens for CosmoFund needs.

a. Funding Team - for team rewards

b. Operational fund - for the payment of bonuses, prizes,payment for the services of contractors and so on.

c. Reserve fund - in case of unforeseen circumstances.

There is a difference between these pools and shares in terms of percentage of total pool regarding the time.

First 28 days distribution

1. Personal Staking Rewards - **62.5% of Daily Pool**

2. Extra Staking Bonus Rewards - **37.5% of Daily Pool**

a. Time Staking Bonus Rewards - 12.5%

b. Direct Referrals Staking Rewards - 12.5%

c. Affiliate Team Staking Rewards - 12.5%

3. CosmoFund Share - **0% of Daily Pool**

Next 28 days distribution

1. Personal Staking Rewards - **56.25% of Daily Pool**

2. Extra Staking Bonus Rewards - **33.75% of Daily Pool**

a. Time Staking Bonus Rewards - 11.25%

b. Direct Referrals Staking Rewards - 11.25%

c. Affiliate Team Staking Rewards - 11.25%

3. CosmoFund Share - **10% of Daily Pool**

a. Funding Team - 4%.

b. Operational fund - 3%.

c. Reserve fund - 3%.

Following days up to 72 years

1. Personal Staking Rewards - **50% of Daily Pool**

2. Extra Bonus Rewards - **30% of Daily Pool**

a. Time Staking Bonus Rewards - 10% (20% of Personal Staking Rewards)

b. Direct Referrals Staking Rewards - 10% (20% of Personal Staking Rewards)

c. Affiliate Team Staking Rewards - 10% (20% of Personal Staking Rewards)

3. CosmoFund Share - **20% of Daily Pool**

a. Funding Team - 7%.

b. Operational fund - 6%.

c. Reserve fund - 7%.

For the first 30 days, CosmoFund gets nothing. That is, the entire pool is spent on personal andteam staking.

For the next 30 days, CosmoFund receives 50% of its main part (10% of the total pool), then italready receives 100%, namely 20% of the total pool.
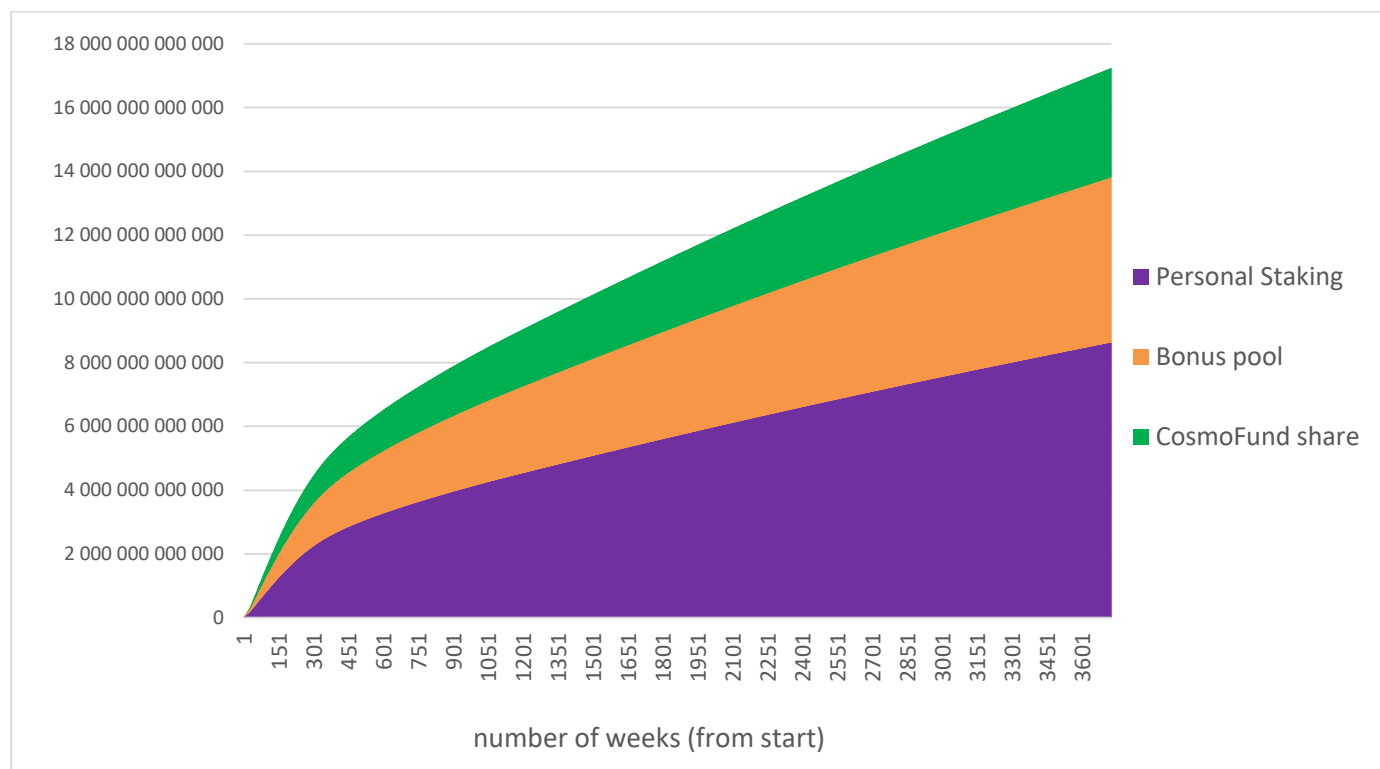

Image 4. All types of distribution schedule for the whole period.

6.7. Personal Staking

This type of staking is implemented entirely through a smart contract, that is, all calculations take place publicly and everyone can check them.

All allocated CCLP tokens are proportionally distributed through the Personal Staking Pool. Proportionality is determined by the amount of CCLP-LP that a person stakes. The more a person stakes CCLP-LP, the more CCLP tokens from the pool he will receive.

Personal Staking Pool is the number of CCLP tokens allocated by a smart contract every day for distribution via staking on a smart contract.

Proportional distribution example:

Let's assume that the daily pool is 1000 CCLP, that is, these tokens are distributed within 24 hours among all people who stake CCLP-LP, in proportion to the number of CCLP-LP tokens they are staking.

Peter stakes 50 CCLP-LP, Kate - 50 CCLP-LP, Mark - 100 CCLP-LP.

In total, all three people stake 200 CCLP-LP - that's 100%.

The share of Peter and Kate is 25% of all CCLP-LP, Mark share is 50%.

Then Peter and Kate will receive 250 CCLP each, and Mark will receive 500 CCLP as a reward for staking. The process of getting CCLP through CCLP-LP staking is called yield farming.

The award can be withdrawn at any time without restrictions. Any number of LP tokens can be withdrawn from staking.

6.8. Direct Referrals Staking

Referrals are defined at the CosmoSwap platform level in a standard way - via registers using referral link. The pool for the payment of referral staking rewards is transferred for the management to the CosmoSwap platform every day in certain parts. Further, the CosmoSwap platform itself distributes referral bonuses to the dashboard of the inviter

The inviter can receive a maximum of 20% of the referral's farmed Cosmo and CCLP amount. If desired, to motivate the referrals, the inviter can give part of the interest to the invitees.

The amount of rewards depends on the affiliate package of the inviter.

The reward is credited automatically once a day. The system keeps track of how much each referral earned on personal staking and automatically awards rewards to the inviter.

Condition: USDTstaked sum equivalent	STARTER	PARTNER	PRO	VIP	ELITE	MAX
	< 50 USDT	50 USDT	500 USDT	3 000 USDT 1 Cosmo NFT	10 000 USDT 3 Cosmo NFTs	50 000 USDT 5 Cosmo NFTs
Direct Staking Reward	No bonus	5%	8%	10%	15%	20%
	Percentage of Cosmo or CCLP received from the farmed Cosmo or CCLP of personally invited referrals					
Team Staking Reward	No bonus	5%	8%	10%	15%	20%
	Percents from smallest total farmed Cosmo or CCLP from one of the two teams.					

Image 5. Direct Staking Rewards depending on the affiliate package.

Cosmo or CCLP for payment of affiliate bonuses is taken directly from the Cosmo or CCLP contracts. The Cosmo and CCLP contracts describe the maximum total number of tokens that a staking contract can receive to pay such a bonus.

Tokens received for affiliate activity are indistinguishable from tokens for staking: they can, for example, be reinvested to staking.

If the pool of partner rewards runs out, the staking contract simply stops making additional charges.

6.9. Time Staking Bonus

This is an additional motivation not to sell the earned Cosmo or CCLP on staking, but to reinvest in the staking.

To motivate a person not to sell tokens, we need to show additional profitability. We have already implemented the mechanics - the more a person stakes, the more they earn Cosmo or CCLP tokens, since the amount of Cosmo or CCLP received is proportional to the number of Cosmo-LPs and CCLP-LPs staked.

Staking duration mechanics

Time Staking Bonus Pool is distributed among those people who stake through their personal account on CosmoSwap. In this case, CosmoSwap knows how much this person is staking and then CosmoSwap can apply various more complex algorithms to accrue Cosmo or CCLP tokens for these people. Such algorithms could not be embedded in a smart contract. That is why the Time Staking Bonus Pool is used for these complex algorithms.

Time Staking Bonus Pool is a part of the bonus payment pool, which is transferred to CosmoSwap by a smart contract every day and CosmoSwap, according to its algorithms, makes accruals to users on their dashboard on the CosmoSwap platform.

The staking mechanism for this pool is the same as for the Personal Staking Pool, that is, where the proportional distribution of Cosmo or CCLP tokens based on the number of staked Cosmo-LPs or CCLP-LPs are used, but also a multiplier depending on the staking time is used to distribute this pool. This coefficientprescribes to the algorithm for distributing Cosmo or CCLP

tokens from the Bonus Pool that for a particular person it is worth taking into account not the true number of staked Cosmo-LPs or CCLP-LPs, but multiplied by this coefficient. Thus, the algorithm, for example, can calculate that a person is not staking 100 Cosmo-LPs or CCLP-LPs, but 150, if the multiplying coefficient was 1.5.

Rules for determining raising coefficients.

1. Staking CCLP-LP for 7+ days: R = 1.2 (20% profitability increase)

2. Staking CCLP-LP for 15+ days: R = 1.5 (50% profitability increase)

3. Staking CCLP-LP for 30+ days (1 month): R = 2 (doubling yield)

4. Staking CCLP-LP for 60+ days (2 months): R = 3 (treble yield)

5. Staking CCLP-LP for 90+ days (3 months): R = 4 (increase in profitability by 4 times)

6. Staking CCLP-LP for 180+ days (6 months): R = 6 (increase in profitability by 6 times)

7. Staking CCLP-LP for 360+ days (1 year): R = 10 (10x yield increase)

Coefficients behavior when staking changes

A user can decide to invest in staking, for example, first 10 USDT, stake for 1 year, thereby increasing his profitability by 10 times. And then he decides to add another 1000 USDT to the staking.

In this case, a proportional recalculation of the staking time will occur.

The arithmetic weighted average number of staking days for the new amount will be calculated using the formula: (10 * 365 + 1000 * 0) / (10 + 1000) = 3.6 days. Round up to whole days - 3. That is, when the amount of staking is increased from 10 to 1000 USDT, the yield increase coefficient will change in accordance with the number of staking days equal to 3.

Any number of LP tokens can be withdrawn from staking, and the coefficient in the bonus pool will then be reseted. When reinvesting to staking, the bonus pool coefficient is recalculated as shown above. When Cosmo or CCLP tokens are reinvested which were not claimed from staking contract before, then the bonus pool coefficient does not change.

Important note

If people stake on the Time Staking Pool, they also automatically participate in the staking on the Personal Staking Pool.

The opposite may not be true if staking is not done through the CosmoSwap platform, but directly through external DEX without joining the wallet (MetaMask) to the CosmoSwap platform. In this case, only staking on a smart contract is possible, since in order to participate in all other types of staking, the CosmoSwap platform must have information about this staking and beable to correlate the staking profile with an account on CosmoSwap.

6.10. Affiliate Team Staking Pool

We are changing the rules for receiving partner packages and now they depend not on the number of purchased Cosmo or CCLP tokens, but on the number of staked CCLP-LP tokens, or, more precisely, on the amount in USDT that was spent on organizing CCLP-LP staking.

Thus, the criterion for a person to receive a partnership package is to freeze a certain amount of money in USDT in the liquidity pool. Depending on the time, the price of CCLP can be different, which means that at different times, freezing the same amount of USDT in the liquidity pool means a different ratio of the amount of frozen CCLP and USDT in the liquidity pool.

That is, we fix the cost of receiving partner packages in absolute currency spent on staking - USDT.

Let's say that, taking into account the current rate, to receive a VIP package, a person needs to add 3000 CCLP-LP to his balance. So, before that, he pledged his CCLP and another coin into liquidity, thereby increasing the demand for CCLP and thereby replenishing liquidity.

With the Affiliate Program we start giving extra CCLP coins for staking CCLP-LPs of other people in the structure. That is, by fulfilling the conditions for obtaining an affiliate package, a person is guaranteed to earn on personal CCLP staking, which he can immediately claim and sell. Moreover, at any time, a person can refuse an affiliate package, cancel staking, return CCLP-LP to the liquidity pool, and get money back from the pool. In other words, unlike staking other coins, for staking at CosmoSwap we also give an affiliate package and the opportunity to earn from group staking of people in the structure.

Team staking mechanics

The daily pool contains a part of the tokens intended for the payment of group / team staking rewards.

There are two algorithms for paying team bonuses for staking. The choice of the algorithm depends on whether there were enough tokens to pay bonuses according to the first algorithm. If that's enough, then the first algorithm is applied, where bonuses to people are credited independently of other people. If with this method of accrual of tokens there are not enough tokens, then the second proportional accrual algorithm is applied.

The algorithm for calculating the bonus independently of other people

Depending on the partner package, a certain percentage of the smallest farmed number of CCLP tokens in one of the teams is credited every day.

Condition: USDT staked sum equivalent	STARTER < 50 USDT	PARTNER 50 USDT	PRO 500 USDT	VIP 3 000 USDT 1 Cosmo NFT	ELITE 10 000 USDT 3 Cosmo NFTs	MAX 50 000 USDT 5 Cosmo NFTs
Direct Staking Reward	No bonus	5%	8%	10%	15%	20%
	Percentage of Cosmo or CCLP received from the farmed Cosmo or CCLP of personally invited referrals					
Team Staking Reward		5%	8%	10%	15%	20%
	No bonus	Percents from smallest total farmed Cosmo or CCLP from one of the two teams.				

Image 6. Team Staking Reward percentages depending on the partner package.

For example, a person has a partner package - VIP. This means that its yield on a weak leg is 10%. Over the past day, one team farmed 100 CCLP, the other 200 CCLP. The person will receive a team staking bonus of 10% from 100 CCLP = 10 CCLP.

Algorithm for proportional bonuses

We distribute the daily pool of tokens among all people in proportion to the total volumes of liquidity tokens (CCLP-LP) in their smaller legs.

Raising coefficients

Depending on the affiliate package, you may have multipliers that affect the proportional allocation of the CCLP token pool. In fact, it is a coefficient that increases the profitability of group staking.

1. Starter (no package): K factor = 0. It is impossible to get rewards on team staking.

2. Partner: K = 1.0. There is no increase in profitability. This is the first package to activatethe ability to get rewards on team staking.
3. PRO: K = 1.2. Increase profitability by 20%.

4. VIP: K = 1.4. Increase profitability by 40%.

5. ELITE: K = 1.6. Increase profitability by 60%.

6. MAX: K = 2.0. Increase profitability by 100%.

Calculation example

For example, the daily pool of tokens for such a distribution is 1000 CCLP. Now the affiliate program includes Peter (Partner), Kate (PRO) and Mark (MAX).

In Peter's weak leg, all people stake a total of 70 CCLP-LP * 1.0 = 70, in Kate - 20 CCLP-LP * 1.2

= 24, in Mark - 10 CCLP-LP * 2.0 = 20.

Then the total number of resulting CCLP-LP tokens will be: 70 + 24 + 20 = 114 - this is 100%. Then Peter's share will be 61.4%, Kate's share will be 21%, Mark's share - 17.5%.
Then at the end of the day Peter will receive 61.4% of 1000 CCLP = 614 CCLP, Kate - 21% of1000 CCLP = 210 CCLP, Mark - 17.5% of 1000 CCLP = 175 CCLP.

Motivation

With this scheme, a person may not invite anyone to his structure, but then he will make money on his own staking, and this is still cool, since he can immediately go and sell Cosmo and CCLP farmed tokens.

But if a person wants to earn more, then he can invite people to the affiliate structure, motivate

them to buy Cosmo and CCLP tokens on CosmoSwap (with PanCake or UniSwap) at the real market price, put them in the liquidity pool, and go to the exchange and stake CCLP-USDT in order to acquire an affiliate package and then earn extra Cosmo or CCLP on staking, which he can then immediately go and sell.

That is, this is X2 motivation, rather than just in the scheme that all other projects implement - own staking earning + staking of the whole affiliate team reward.

7. What is CosmoFund

CosmoFund is an ecosystem that brings together digital artists from the digital art gallery www.instagram.com/cosmofondart, crypto enthusiasts, PR specialists, IT specialists, investors. CosmoFund is a community where absolutely every participant who has made the greatest contribution to a particular field of activity can become an opinion leader.

Disclaimer

This White Paper does not constitute a prospectus nor offer document of any sort and is not intended to constitute an offer or solicitation of securities or any regulated product in any jurisdiction. This White Paper has not been reviewed by any regulatory authority in any jurisdiction. You acknowledge and agree that Cosmo and CCLP tokens do not stand for or function as:

1. equity interest or control power in, or obligations of CosmoFund, or that of any other entity in any jurisdiction, or any discretion in connection with CosmoFund or aforementioned entities;
2. investment of any kind in any venture;
3. any securities having intrinsic value or market price; or
4. any commodity or asset that any person is obliged to redeem or purchase.

CosmoFund hereby disclaims all responsibility for any loss or damage arising from or relating to your use of any CosmoFund services (including, but not limited to, risk of losses due to buying or acquiring Cosmo and CCLP tokens, trading or due to factors beyond its control regarding the viability of any specific blockchain network). CosmoFund further disclaims all responsibility for any loss or damages arising from or relating to any cyber-attacks (including without limitation the theft of your personal information), unprecedented surges in trading volume, any disruption or shut down of CosmoFund services, or other technical difficulties with respect to CosmoFund services.

You acknowledge and agree that CosmoFund is not responsible for determining whether or which laws, rules, or regulations apply or may apply to your transactions (including, without limitation, any anti-money laundering laws, securities laws and tax laws). You acknowledge and agree that you are solely responsible for compliance with all such laws rules, or regulations as may be applicable to your transactions. Without limiting the foregoing, you acknowledge and agree that you are solely responsible for all tax obligations arising from your use of CosmoFund's services. You further acknowledge and agree that CosmoFund shall not be liable, whether directly or indirectly, for any of your tax obligations.

Citizens, nationals, residents (tax or otherwise) and/or green card holders of the United States of America and/or any other jurisdiction which prohibits the possession, dissemination or communication of the available information and/or prohibits the purchase of Cosmo and CCLP Tokens or anyother kind of working with cryptocurrencies, tokens or digital assets, or any such similar activity or any other Restricted Persons are not permitted to purchase tokens. In no event shall CosmoFund or any current or former CosmoFund representatives be liable for the Excluded Liability Matters. CosmoFund does not make or purport to make, and hereby disclaims, any representation, warranty or undertaking in any form whatsoever to any entity or person, including any representation, warranty or undertaking in relation to the truth, accuracy and completeness of any of the information set out in the available information. You should carefully consider and evaluate each of the risk factors and all other information contained in the terms before deciding to purchase, trade or stake/farm Cosmo and CCLP Tokens.
